Learning Intent for Food and Nutrition at St Catherine's College September 2019

Food and Nutrition Curriculum Intent

We aim to enable our students to become enthusiastic and competent learners in Food and Cookery. Students are encouraged to develop a love of and understanding of Food and Cookery through practical work where they learn the key skills and knowledge which enable them to progress to higher skills at KS4.

Students are introduced to a broad range of cooking methods and commodities in order to enhance their awareness of a wide variety of foods and healthier cooking methods.

Through our curriculum, we aim for students to become as independent as possible, to prepare them for the life skills of cooking at home and to enable them to progress to the next steps in their lives.
